WORK EXPERIENCE

AccelByte Inc.

Remote / Washington, USA

Software Engineer

Jun 2021 – Present

- Built and maintained developer-facing products across React, Electron, Node.js, and Go, spanning user interfaces, backend services, APIs, and operational tooling.
- Architected a code-generated TypeScript SDK that transformed OpenAPI definitions into a strongly typed, modular client, reducing hand-written wrappers and simplifying integration for internal teams and customers.
- Owned the SDK's semantic versioning and release automation, establishing predictable releases, backward-compatible upgrade paths, and clearer migration guidance.
- Replaced an enterprise release-planning platform with focused internal products, including a Release Manager UI and terminal workflows, reducing software costs and operational complexity.
- Led the delivery of an AI assistant for game developers, combining streaming responses, tool calling, contextual application data, usage guardrails, MCP, BYOK, and build-log diagnostics.
- Established a repeatable load-testing process for a Remix and Node.js application stack, improving performance by 7x while reducing VM load.

Saraf Design

Semarang, Indonesia

Founding Engineer / Full-Stack Software Engineer

Jan 2019 – Dec 2021

- Shipped and maintained more than 30 client products, including business websites, internal systems, and custom web applications.
- Worked directly with clients to identify business goals, define MVP scope, and iterate on products using post-release feedback.
- Owned delivery across interface design, frontend development, backend workflows, database integration, and deployment handoff using Laravel and Vue.js.

Undip Career Center (UCC)

Semarang, Indonesia

Full-Stack Software Engineer — Contract

Apr 2021 – Jun 2021

- Developed and delivered a job seeker center website using Laravel and Vue.js, translating stakeholder requirements into a usable production application on a short contract timeline.

PROJECTS

ai-drew-toolbar

OSS

- Browser extension that lets developers inspect a live web app, select a UI element, and copy relevant code context such as file paths, component names, and HTML structure for use with AI coding tools.

Lazy Bitbucket Dashboard

OSS

- Terminal user interface for browsing Bitbucket pull requests, built with Bubble Tea and the Charm framework with a focus on fast keyboard-driven review workflows.

MSR Archiver

OSS

- Bun-based TUI and Go CLI for archiving Arknights OSTs with album and song metadata, cover art, lyrics, and ffmpeg-powered WAV-to-FLAC conversion.

Dead Simple Markdown Notes

OSS

- Markdown note-taking application designed around speed and simplicity.

SKILLS, LANGUAGES, INTERESTS

- **Languages:** Bahasa Indonesia (Native Speaker), English (Business proficiency)
- **Product Engineering:** React, Electron, Next.js & Remix.js, Tailwind CSS, Customer-Focused Product Development, MVP Scoping & Iteration
- **Languages & Platforms:** TypeScript & JavaScript, Go, Python, Node.js & Bun, SQL & PostgreSQL

- **APIs & Developer Experience:** REST APIs, OpenAPI & Code Generation, CLI & TUI Tooling, Release Automation, CI/CD, Performance Testing
- **AI Engineering:** Vercel AI SDK, Model Context Protocol (MCP), Tool Calling, Context Engineering, AI-Assisted Product Experiences
- **Tools:** Git, Docker, Figma
- **Interests:** Developer Tools, AI-Assisted Product Experiences, Game Technology, Terminal Interfaces, Arcade Games, Reading Non-fiction

EDUCATION

Diponegoro University

Bachelor of Science in Computer Science

- **Honors:** GPA: 3.62 / 4.00, Cum Laude

Semarang, Indonesia

Jun 2017 – May 2021

LEADERSHIP AND ACTIVITIES

Informatics Student Board (HMIF)

Head of Communication and Information

- Led communication strategy, content production, and website development for the university's Informatics Student Board.

Semarang, Indonesia

Jan 2018 – Jan 2020

RESEARCH AND PUBLICATIONS

YOLOv4 Algorithm Implementation Based on Darknet and Optical Character Recognition on Vehicle License Plate Detection

Published on *AIP Conference Proceedings, ICENIS 2023*

May 2023
